PREFACE

The rate of population growth is determined by natural increase that is the excess of births over deaths on the one hand, and the balance of inward and outward migration on the other. It is to changes in the one or the other of such interacting factors as migration, mortality, marriage and the size of the family that the trend of population is intimately related. Migration data therefore is considered very important for demographic studies. The six tables presented in this volume form a series on this subject which if continued and improved upon in future censuses will be helpful in projecting the various aspects of the trends of migration to a large extent.

I ám grateful to Shri Asok Mitra, Registrar General, India, and the Central Tabulation Officer Shri K.D.Ballal for their guidance in this matter. I also thank Dr. U.B. Mathur, Deputy Superintendent, Census Operations, Rajasthan who has assisted me in this work.

INTRODUCTION

The classification of population according to the place of birth provides basic data for several type of analysis although it has very specific limitations. It makes possible some measure of the volume and source of migration into a specified area. The data on migration thus obtained is very crude as it does not take account of migrants died between the time of migration and date of enumeration and of those who have returned to their place of birth or who have moved on to other areas after migration to the area in question. It also does not take account of previous migrations between the time of birth and the time of entering the given area. Thus, it does not show the amount of migration to and from any particular area within any given time correctly. Migration data can however be refined if it can be made available for a number of censuses.

In the past censuses the data relates to migration was presented only for non-Indian nationals and on place of birth which was not sufficient for any detailed study on migration.

The Census 1961 has made a beginning in building up these required information. On the basis of questions asked on age, educational qualification, birth place, whether born in urban or rural areas, duration of residence, nationality and questions relating to work, a series of following tables have been built up:-

D - I	...	Non-Indian Nationals
D - II	...	Place of Birth
D - III	...	Migrants Classified by place of Birth and Duration of Residence in place of Enumeration
D - IV	...	Migrants to Cities Classified by Sex, Broad Age Groups, Educational Levels and in case of workers also by Occupational Divisions and Groups
D - V	...	Cities Showing Population Born Locally, Migrants from Rural Areas and Migrants from Other Towns and Cities
D - VI	...	Distribution of Industrial Categories of Workers and Non-workers by Place of Birth

These tables contain information on the number of persons belonging to foreign nationalities residing in the State at the time of Census 1961, distribution of population by birth place, duration of residence it the place of enumeration and distribution of population by place of birth and by industrial categories of workers and non-workers. Two of these tables relate only to the cities; while one shows the classification of migrants by sex, broad age groups and educational levels (also by occupational divisions and groups it case of workers) the other shows population born locally and migrants from rural and other urban areas The pages that now follow contain the Migration Tables.

TABLE D-I

NON-INDIAN NATIONALS

NON-INDIAN NATIONALS

(Note on Table D-I)

This table which corresponds to Table D-VI of 1951, gives for the State and down to the district level the number of persons belonging to different foreign nationalities, except those employed in foreign embassies and missions, who were resident in Rajasthan during the Census 1961. All the foreign nationals have been distributed according to the continents and countries to which they belong. Every important country of the world appears in the Table and figures for other countries have been lumped and shown under 'elsewhere' of each continent, details of which appear in the Appendix to this table.

TABLE D-II

PLACE OF BIRTH

PLACE OF BIRTH

(Note on Table D-II)

This basic migration table, which corresponds to Table D-IV of 1951 to some extent, gives the distribution of population by birth place. It is presented down to district for total/rural/urban.

A new feature of the table is that the birthplaces in rural and urban areas are shown separately in the case of those born in India. The place of enumeration is also classified separately into rural and urban to give an indication of the nature of migration.

It may be noted that under group A details of those born in India are shown while groups under B, C, D, E & F, present information for countries in Asia beyond India (including U.S.S.R); countries in Africa; countries in two Americas and countries in oceania. The various countries included under each group is indicated below:-

(B) Afghanistan, Burma, Ceylon, China, Nepal, Pakistan, Singapore, Malaya, British Borneo and U.S.S.R.

(C) Ireland & U.K. (including N. Ireland)

(D) Union of South Africa

(E) Canada & U.S.A.

(F) Australia

Names of places of birth from where the number of migrants was low have not been shown separtely under the above mentioned groups and the returns are shown under 'elsewhere' in each group. These details are available in the supplement to this table.

All places from where migrants were not reported have been omitted from this table. The lines for Rural/Urban/Unclassifiable under Group A have been omitted from the table in cases where there are nil entries.

TABLE D-III

MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

MIGRANTS CLASSIFIED BY PLACE OF BIRTH AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

(Note on Table D-III)

This table, which is introduced for the first time to supplement the information contained in the previous table (Table D-II) with a view to help in the study of in-migration, presents down to the district level information on the duration of residence in the place of enumeration. The duration of residence is classified into : less than 1 year; 1-5 years; 6-10 years; 11-15 years and 16 years and over. The group 11 to 15 years yields information on population displaced by partition. The place of birth within India has been classified into rural and urban. The countrywise data about persons born outside the country have been provided in respect of Nepal and Pakistan only and the rest of the countries have been clubbed together and shown as 'other Countries outside India'.

TABLE D-IV

MIGRANTS TO CITIES CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS AND IN CASE OF WORKERS ALSO BY OCCUPATIONAL DIVISIONS AND GROUPS

MIGRANTS TO CITIES CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS AND IN CASE OF WORKERS ALSO BY OCCUPATIONAL DIVISIONS AND GROUPS

(Note on Table D-IV)

The table relates to migrants to the cities. The migrants to these places are shown classified by sex, broad age-groups and educational levels. The Occupational Divisions and Groups, according to the National Classification of Occupations, are also shown for workers except those in Industrial categories I & II (Cultivators and Agricultural labourers). This gives an indication of occupations that attract migrants to the cities. The educational levels show the skilled and unskilled type of workers among the migrants.

Occupational groups having less than 5 per cent of the workers of the respective Division and 2.5 per cent in case of Division 7-8 have not been shown in the table but are given in an Appendix to this table. Divisions thus affected are marked with an asterisk (*).

The relevant extract from the National Classification of Occupations for Divisions and Groups is reproduced below to enable the reader to ascertain the descriptions of Divisions and Groups occurring in this table:

TABLE D-V

CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL AREAS AND MIGRANTS FROM OTHER TOWNS AND CITIES

CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL AREAS AND MIGRANTS FROM OTHER TOWNS AND CITIES

(Note on Table D-V)

The table shows the population of the various Cities classified as (i) born locally, (ii) migrants from rural areas and (iii) migrants from other towns and cities. It thus indicates the extent of immigration from rural and other urban areas into the Cities. The immigration from rural and other urban areas has also been separately classified by migrants who have been resident for less than 3 years and those who have been resident for 3 years and more at the place of enumeration.

The total population shown in this table for the various Cities do not indicate their actual population as persons, whose birth place was not recorded as either rural or urban or whose duration of residence was not stated or whose place of birth could not be classified, have not been included. Persons born outside the country have also not been included.

TABLE D-VI

DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS
AND NON-WORKERS BY PLACE OF BIRTH

DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND NON-WORKERS BY PLACE OF BIRTH

(Note on Table D–VI)

The table shows the distribution of workers and non-workers by their industrial categories and by their place of birth. It thus throws out valuable information on the category of workers and non-workers among the migrants by their birth place.

It is presented upto district level rural/urban and city level. For rural, it is prepared for those born in India and that too only for those born within the State of enumeration. In addition to this, four numerically most important States of immigration are given for each district.

In case of 'total' and 'urban' the table also covers those born outside the country and all other States in India. It, however, excludes the information about those States from where the immigrants are less than one per cent of the total immigrants. The States thus excluded are mentioned in Appendix I to this table. No such abridgement has been made in respect of cities.

It may be noted that the total population figures shown in the table do not agree to the totals of various groups of countries/States where born. This is because the total population figures also contain persons whose birth place could not be classified as urban or rural in the group 'Born in India'. These 'unclassifiable' figures have not been mentioned in this table as they were less than 5% of the total migrants in this group. The total population figures also include the immigrants from other States whose proportion is less than 1% of total immigrants which have not been mentioned in this table but find place in its Appendix I.

The names of the foreign countries included under various groups have already been mentioned in the note to Table D–II and the total of the remaining countries is given against 'elsewhere' in the table, the details of which are available in Appendix II to this table.
